

ODCalc

Privacy Policy

Last Updated: March 2026

1. Introduction

This Privacy Policy describes how ODCalc (“we”, “our”, or “the App”) handles information when you use our mobile application. We are committed to protecting your privacy and being transparent about our data practices.

2. Information We Do NOT Collect

ODCalc is designed with privacy as a first principle. The App operates entirely locally on your device and does NOT collect, transmit, or store any personal information, including:

- No personal identification information
- No email addresses or contact information
- No location data
- No usage analytics or behavioral tracking
- No account creation or login required
- No data is ever transmitted to external servers

3. Data You Enter

ODCalc processes only the numerical values you type directly into the App, specifically:

- Measured optical density (OD) values obtained from your spectrophotometer
- Target OD values for dilution calculations
- Culture volumes and dilution parameters

All entered data is processed locally on your device in real time and is not transmitted, shared, or stored beyond your device's local storage.

4. Local Data Storage

All data processed by ODCalc remains on your device:

- Calculation inputs and results are stored only on your device
- You have complete control over this data and can delete it at any time
- Data is not backed up to our servers (it may be backed up to your iCloud if you have enabled iCloud backup for this App)

5. Data Export

If you choose to export your calculation data:

- Exports are generated locally on your device (e.g., CSV or text formats)
- You control where exported files are shared (email, cloud storage, etc.)

- We do not receive copies of your exported data

6. Third-Party Services

ODCalc does not integrate with any third-party analytics, advertising, or tracking services. The App does not contain:

- No advertising networks
- No analytics tracking (e.g., Google Analytics, Firebase)
- No social media integrations
- No crash reporting services that transmit data

7. In-App Purchases (Apple Watch Version)

The iOS version of ODCalc is provided free of charge. A paid version is available for Apple Watch. If you make a purchase:

- Purchase transactions are handled entirely by Apple through the App Store
- We do not have access to your payment information
- Apple's Privacy Policy governs the collection and use of payment data
- We only receive confirmation that a purchase was made (no personal or payment details)

8. Children's Privacy

ODCalc does not knowingly collect any information from anyone, including children under 13. The App is designed for educational and professional use in microbiological and laboratory settings.

9. International Users

ODCalc is available worldwide. Since all data processing occurs locally on your device, no data crosses international borders through our App.

10. Your Rights

Since we do not collect or store your personal data, there is no personal data for us to access, modify, or delete. You have complete control over all data generated by the App on your device.

11. Data Security

Because all data remains on your device:

- Your device's built-in security protects your data
- We recommend keeping your device password-protected
- Enable iCloud backup if you want to preserve your data across devices

12. Changes to This Policy

We may update this Privacy Policy from time to time. Any changes will be reflected by updating the "Last Updated" date at the top of this policy. We encourage you to review this policy periodically.

13. Contact Us

If you have questions or concerns about this Privacy Policy, please contact us at:
